DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yuang et al (IEEE Journal on Selected Areas in Communications, vol. 15, #2, 1997, pp 136-146) in view of Jain (6259677).

As per claims 1,4,5,8,9,16, Yuang et al teaches presenting a multimedia signal to a user and varying the presentation speed to the user dependent upon a difference delay measurement of the packet delay, and adapting the reference value (pp 144, col. 2, conclusion)

Yuang et al does not explicitly teach a time delay of approximately 240%, however, Jain (6259677) teaches a delay of up to 300% in a presentation of packet information (three delays -- 300%; col. 4 lines 55-64). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify teachings of Yuang et al with a modified delay up to 300% because it would advantageously address the problem of jitter underflow (Jain, col. 3 lines 1-6).

Art Unit: 2655

As per claims 2 and 3,10,11, Yuang et al teaches varying the duration such that the Variance of Discontinuity is minimized (pp. 138, col. 1 line 1 up to “Source Traffic Model”)

As per claims 6,7,12,13, Yuang et al teaches object, video signals (pg. 143, and figs. 14 and 15)

As per claims 14,15, Jain teaches using the timestamps to derive a delay value, and measuring a delay by the number of packets (col. 6 lines 14-53).

Response to Arguments

3. Applicant's arguments with respect to claims 1-9, and 14-16 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2655

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
